

US-DC-Washington/Metro-Mid-Level Network Engineer

Who we are

InfoStructures, Inc. is a network consulting firm located in Rockville, MD. Since 1988 we have been employing leading-edge technologies and techniques to improve the working lives of others. We are seeking energetic, highly-motivated, qualified network engineers with the right attitude toward customer service. We place great value in the work our engineers do and in the difference their efforts make in people's lives.

What makes us different than other networking companies? It's simple: the quality of our services and our attention to detail.

What experience you need:

Five years plus (5+) providing multi-platform networked systems support, preferably in a consulting environment. You should have:

- Superior problem-resolution skills
- Ability to weigh options and provide the most efficient and cost-effective solution from a number of options.
- Excellent oral and written communication skills, including an ability to deal with people at various levels, from technician to executive
- Strong track record in leading a technical team and in building client relationships.

In-depth abilities in any of the following: system and requirements analysis; technical architecture and design; networking telecommunications; computer security

Strong working knowledge of installing, configuring, and troubleshooting products in as many of the following areas as possible:

- Microsoft Windows 2000/2003 Server with a high-level understanding of Active Directory design and implementation
- Windows NT 4.0 Server, NT 4.0 Terminal Server Edition
- Citrix Metaframe
- VMWare
- Microsoft Exchange Server 5.x, 2000, 2003 plus OWA and SSL
- BackupExec for NetWare, NT, and Windows 2000, 2003 Server
- HP/Compaq and Dell servers

- ❑ PC configuration distribution tools (e.g., Ghost, ServerMagic, ZENWorks)
- ❑ Strong connectivity background (TCP/IP and IPX protocols, knowledge of Cisco, Watchguard networking equipment)
- ❑ MS Office Suite
- ❑ Connectivity to NetWare 4-6, Unix, AS/400

What education/training/certification you need

MCSE (Windows 2000 / 2003)

Bachelors degree in a technical discipline desired

What you will do

You will provide on-site and remote network integration and support services to our government and commercial clients, mostly in mixed Novell/Win2k environments.

You will also:

- ❑ Plan, implement and provide advice on server and network (LAN/WAN) configurations and migrations
- ❑ Evaluate complex network requirements and resolve LAN- and WAN- and Internet-related connectivity issues; suggest improvements to client network infrastructures
- ❑ Design and configure network backup systems
- ❑ Plan and configure security models for network access to servers and other network resources
- ❑ Provide team leadership on technical projects and technical guidance to other engineers
- ❑ Integrate different software and/or operating-system platforms; evaluate COTS and develop prototype configurations for large-scale rollouts
- ❑ Identify, develop and improve techniques for centrally managing servers and clients
- ❑ Develop technical reports and documentation
- ❑ Complete other duties as assigned

Where you will do it

You will work primarily at client sites in and around the Washington, DC area, with some work at InfoStructures' headquarters in Rockville, Maryland.

Benefits

InfoStructures provides a comprehensive benefits package that includes paid vacation, personal/sick days, employee health insurance coverage, and a 401(k)/profit sharing plan.

Please forward cover letter, resume and salary history/requirements to personnel@infostructures.com or fax to Personnel at (301) 417-7177. Equal Opportunity Employer.
